Kineo Analytics Standard Dashboard

 Jon Evans
Product Owner

The primary dashboard is the landing screen for clients viewing the embedded dashboard in Kineo Totara TXP. The dashboard is called 'Kineo Analytics Standard Dashboard' in Sisense and is the one to select in the Kineo Totara TXP plugin settings. It provides a global view of the five main metrics and is the launchpad for each of the secondary dashboards.

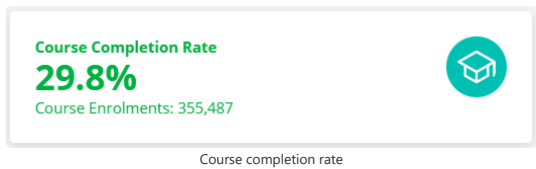

The dashboard is made up of five main metrics. Selecting each metric navigates the user into a secondary dashboard relating to that metric.

Program Completion

The % of assigned learners at a status of complete for all program completion records over all time.

Course Completion

The % of enrolled learners at a status of Complete /Complete via RPL for all course completion records over all time.

Certification Completion

The % of assigned learners at a status of Certified for all certification completion records over all time.

Seminar Attendance

Seminar attendance rate

The % of attendees at an attendance status of Fully or Partially Attended for all bookings (with the exception of cancelled events and waitlisted bookings) for all seminar events over all time.

Average Learning Hours

Average learner hours

The average time spent learning in hours per user, across SCORM and Instructor-led training (seminar events).
Time in SCORM per learner doesn't include SCO statuses of Not Started or Not Attempted.
Seminar duration per learner is (total duration in hours of all fully attended seminar events) + (total duration of all partially attended seminar events / 2)
